

INTUITIVE CONTROL SOFTWARE

The new control software with integrated, extensive maintenance menu makes the operation simple and comfortable.

BRILLANT 240

The BRILLANT 240 is a wet abrasive cut-off machine with fine dynamic and manual vertical wheel movement (chop cut) for samples up to Ø 95 mm and electromechanical lever brake. The automatic X-axis allows a precise pulsed cut and oscillation

cut while the spacious cutting chamber gives various clamping variations.

The solid aluminum design comes with openings on the right and left hand side for cutting long parts.

HORIZONTAL MOVEMENT

The manual horizontal or automatic movement allows cutting long parts longitudinally and easy positioning of the sample below the cut-off wheel. In pulsed cutting mode the sample material is cut particularly gently.

FINE DYNAMIC CUT-OFF

With the manual cutting movement, the cutting force is regulated through a set of gears. The cut is thereby jerk-free and more precise. The easy-to-use lever brake fixes the cutting disc in any position.

INNOVATIVE DETAILS

The sliding front door and the side door with safety interlock allow easy and optimal access to the cutting chamber, which is optimal illuminated by a LED lamp. The Quick-Change-System makes change of the cutting wheel quick and easy and simplifies maintenance.

AUTOMATIC CROSS TRAVEL

The automatic Z-axis can be adjusted with 0.1 mm precision for parallel cuts.
